## 建議如何使用 MyCT 學華語

### Suggestions on How to Use MyCT to Learn Chinese

1. 華語最有效的方法，就是透過先聽說後讀寫的方式。

The most effective way to learn Chinese is through listening and speaking, then reading and writing.

2. 建議學習步驟及方式：

Suggested study steps and methods :

- (1) 先了解學習單元主題。

Understand the topic of the unit first.

- (2) 完整聽完單元內容，同時不看內容及翻譯，先了解自己聽懂的比例有多少。

Listen to the entire unit without looking at the content or the translation, and see how well you understand it.

- (3) 再聽一次單元內容，針對聽不懂或是一知半解的中文句子，使用單句練習模式練習。

Listen to the unit again and use the sentences practice mode to practice the Chinese sentences that you do not understand or do not know.

- (4) 該句完成單句練習後，點選發音，語調，流利度，音量，了解問題在哪裡及如何改善，發音的部份，可以點選喇叭圖示觀看 3D 動畫圖，並檢視與 MyCT 老師的差異再哪裡，同理語調，流利度及音量等都可以查詢，MyCT 建議 80 分為學習的基準，若分數高於 80 分，則表示您該句學習成效良好，若低於 80 分，則是需要再加強。

After completing the sentence practice, press pronunciation, intonation, fluency and volume to understand where the problems are and how to improve and fix them. For the pronunciation part, you can press the horn icon to watch the 3D animation and see where the differences between your pronunciation and MyCT teachers are.

- MyCT 並不是發音矯正軟體，3D 動畫圖示是協助學會了解發音的問題，若是能分辨出來差異點，則聽力及口說能力絕對會有所進步。

MyCT is not pronunciation correction software. The 3D animations are to help learners to understand pronunciation problems. If you can distinguish the differences, you will definitely improve your listening and speaking skills.

- (5) 再聽一次課程內容，此時搭配觀看翻譯。

Listen to the course content again and read the translation.

- (6) 利用跟讀或角色扮演，複習學習的課程單元內容。

Review the course content studied in the Repeat or Role Play mode.

- (7) 使用自我檢定或強化練習，檢測學習的成果。

Use Self Test or Reinforcement mode to test the results of learning.

- (8) 使用複誦練習，在只聽到句子聲音的情況下，看看自己聽懂多少內容，若是聽懂句子內容，定可以完整複誦該句。

Use the Sentences mode to see how much you understand when you only hear the sentence, and if you understand the sentence, you can definitely repeat the whole sentence.

3. 將學過的課程內容中的情境對話華語句子實際運用出來，找華語老師練習對話或者自己一個人模擬情境對者鏡子練習，切記，一定要開口，不要害怕。

Use the Chinese sentences in the contextual dialogues you have learned in the course and practice the dialogues with a Chinese teacher or by yourself in a mirror.

4. 完整完成一個 MyCT 華語課程學習後，若發現複誦、強化練習、自我檢定或跟讀學習模式完成時間縮減或試成績分數提高，則代表華語聽說能力有進步。

After completing a MyCT Chinese course, if you find that the time for Sentences, Reinforcement, Self Test, or Repeat mode has decreased or your test scores have increased, you have improved your Chinese listening and speaking skills.

- 華語的學習需每日不間斷才会有顯著的效果，建議哪怕一天只有 10 分鐘也都可以使用 MyCT。

Chinese language learning requires practicing every day to achieve significant results.

It is recommended that you use MyCT even if you only have 10 minutes a day.

## 麥克風測試

### Microphone Test

請檢查您的音效設備是否安裝妥當，譬如，麥克風及耳機之接頭是否接妥。通常電腦主機後方的綠色接孔為「音效輸出端」，用以連接耳機，紅色接孔則是「音效輸入端」；倘若無法由顏色及其上之文字標記區分，請參閱您的電腦使用手冊。某些品牌的耳機附有「音量控制旋鈕」，請先檢查開關，並調整至適當大小。

Please check whether your audio equipment is properly installed, for example, whether the microphone and headphone connectors are properly connected. Usually the green hole on the back of the computer is the "audio output" for the headphones, and the red hole is the "audio input"; if you can't tell the difference by the color and the text marks on it, please refer to your computer's user manual. Some brands of headphones have a "volume control knob", so please check the switch first and adjust it to the appropriate level.

## 麥克風調整設定說明步驟

### Microphone Adjustment Setting Instruction

準備耳機麥克風。

\*電腦若要使用手機免持聽筒或手機使用耳機麥克風錄音時，需確認是否需要外接 3.5MM 音源轉接線

Prepare the headset.

\*Connect the headset to your computer if you want to use the handset hands-free or use the headset on your phone to record, and you need to check if you need an external 3.5mm audio adapter cable

## Windows Vista / 7 / 8 / 10 麥克風錄音調整步驟圖示

### Windows Vista / 7 / 8 / 10 Microphone Recording Adjusting Instruction

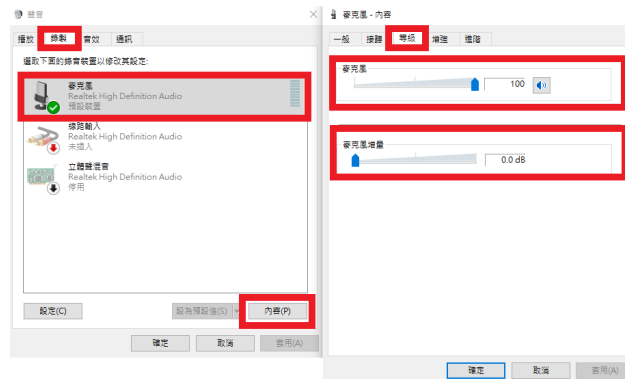

- (1) 直接在螢幕右下角的喇叭圖案上點擊滑鼠右鍵，選擇「錄音裝置」或「音效」。

Right-click on the speaker icon at the bottom right corner of the screen and select "Recording Device".

- (2) 進入麥克風-內容-選擇-「等級」-將麥克風之音量調整至適當位置。

Go to Microphone - Content - Select - "Level" - Adjust the volume bar of the microphone to the appropriate position.

- ✓ 一般多數電腦只要調整麥克風收音音量大小即可正常錄音，並不需特別開啟麥克風增量。

Most computers can record normally by adjusting the volume of the microphone. There is no need to turn on the microphone boost.

(開啟麥克風增量，容易出現 pop sound 或是 noisy background 的圖示)

(If you turn on the microphone boost, pop sounds or the noisy background icon is more likely to appear.)

- ✓ 若說話音量太小或是說話很大聲卻收不到音，而出現 too soft 的圖示，請先將麥克風的音量調大再進行錄音；若麥克風的音量調到最大還是出現 too soft 的圖示，此時才需開啟麥克風增量。

If the microphone volume is too low or if it can't receive the sound when you speak loudly and the "too soft" icon appears, please turn up the microphone volume before recording; if the microphone volume is turned up and the too soft icon still appears, then you need to turn on the microphone boost.

(正常錄音情況下開啟麥克風增量，容易出現 pop sound 或是 noisy background 的圖示)

(If you turn on the microphone boost, pop sounds or the noisy background icon is more likely to appear.)

- ✓ 正常錄音情況下(未開啟麥克風增量)而出現 pop sound 或是 noisy background 的圖示時，請將麥克風音量調小或者是麥克風距離嘴巴遠一點；若在必須開啟麥克風增量才能正常錄音的情況下，卻出現 pop sound 或是 noisy background 的圖示，可微調麥克風音量達到錄音最佳狀態。

If the pop sounds or noisy background icon appears under normal recording conditions (without the microphone boost on), turn down the microphone volume or move the microphone further away from your mouth; if the pop sounds or noisy background icon appears when you must turn on the microphone boost to record normally, fine-tune the microphone volume to achieve the best recording quality.
